ENT207TC

ENTREPRENEURSHIP & ENTERPRISE HUB

WEEK 2 WORKSHOP

Problem–Solution Selection and Sketching

Four hours, two working parts, one decision: the problem your team will build for.

SYNTERRA STUDIO · TAICANG

WHO WE ARE

Introducing the EEH

WHAT WE DO

Role of the EEH

Role of EEH

We are Entrepreneurship and Enterprise Hub (EEH)

- The Platform in connecting all the Industry Schools in XJTLU Entrepreneur College.
- Expert in designing activities to foster the entrepreneurial spirit in a fun way.

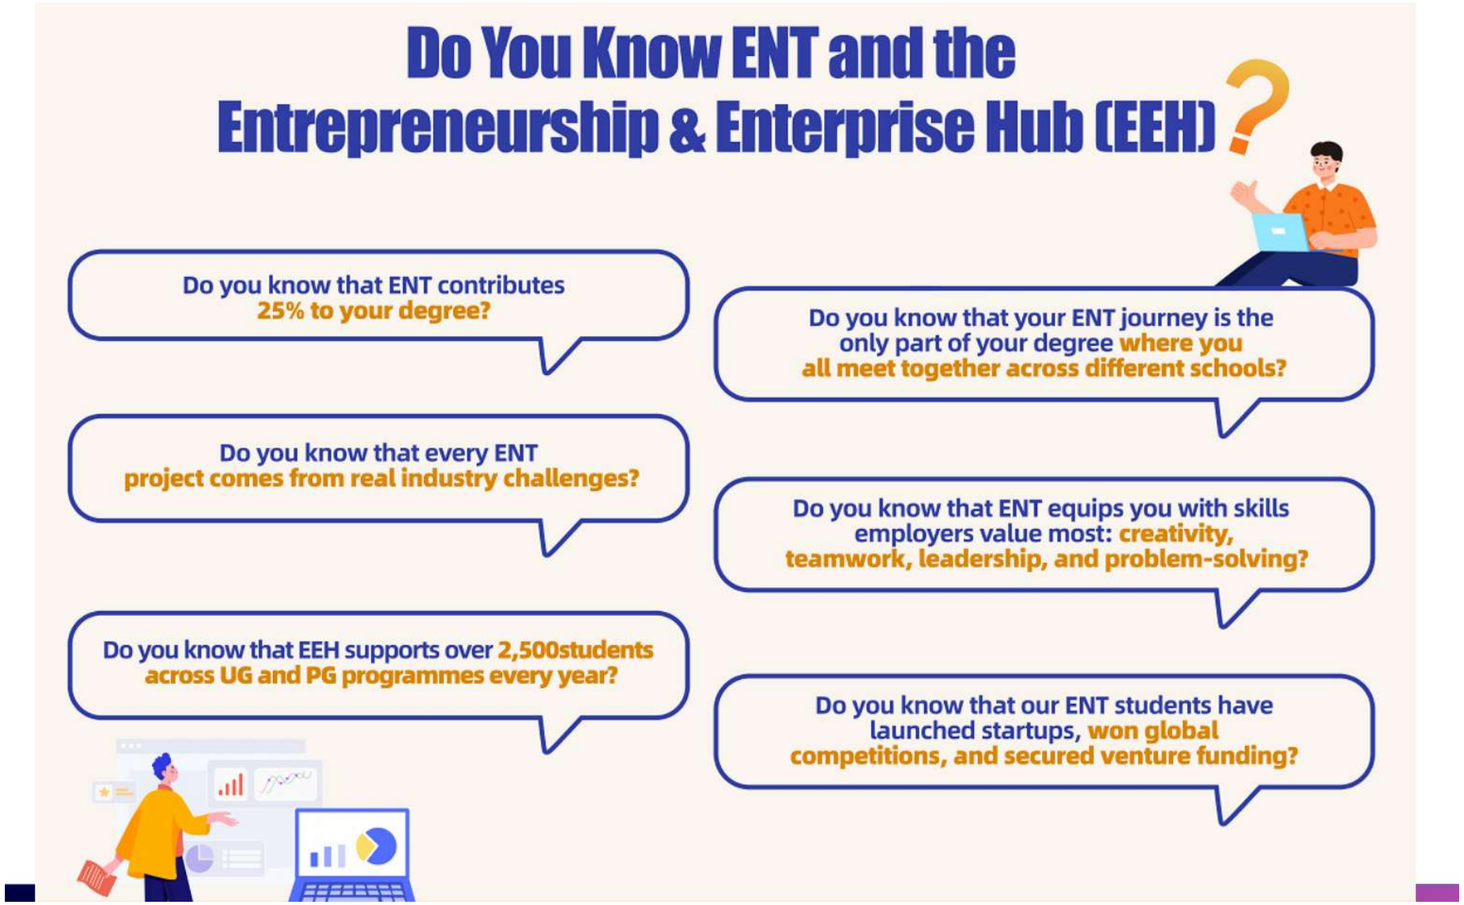

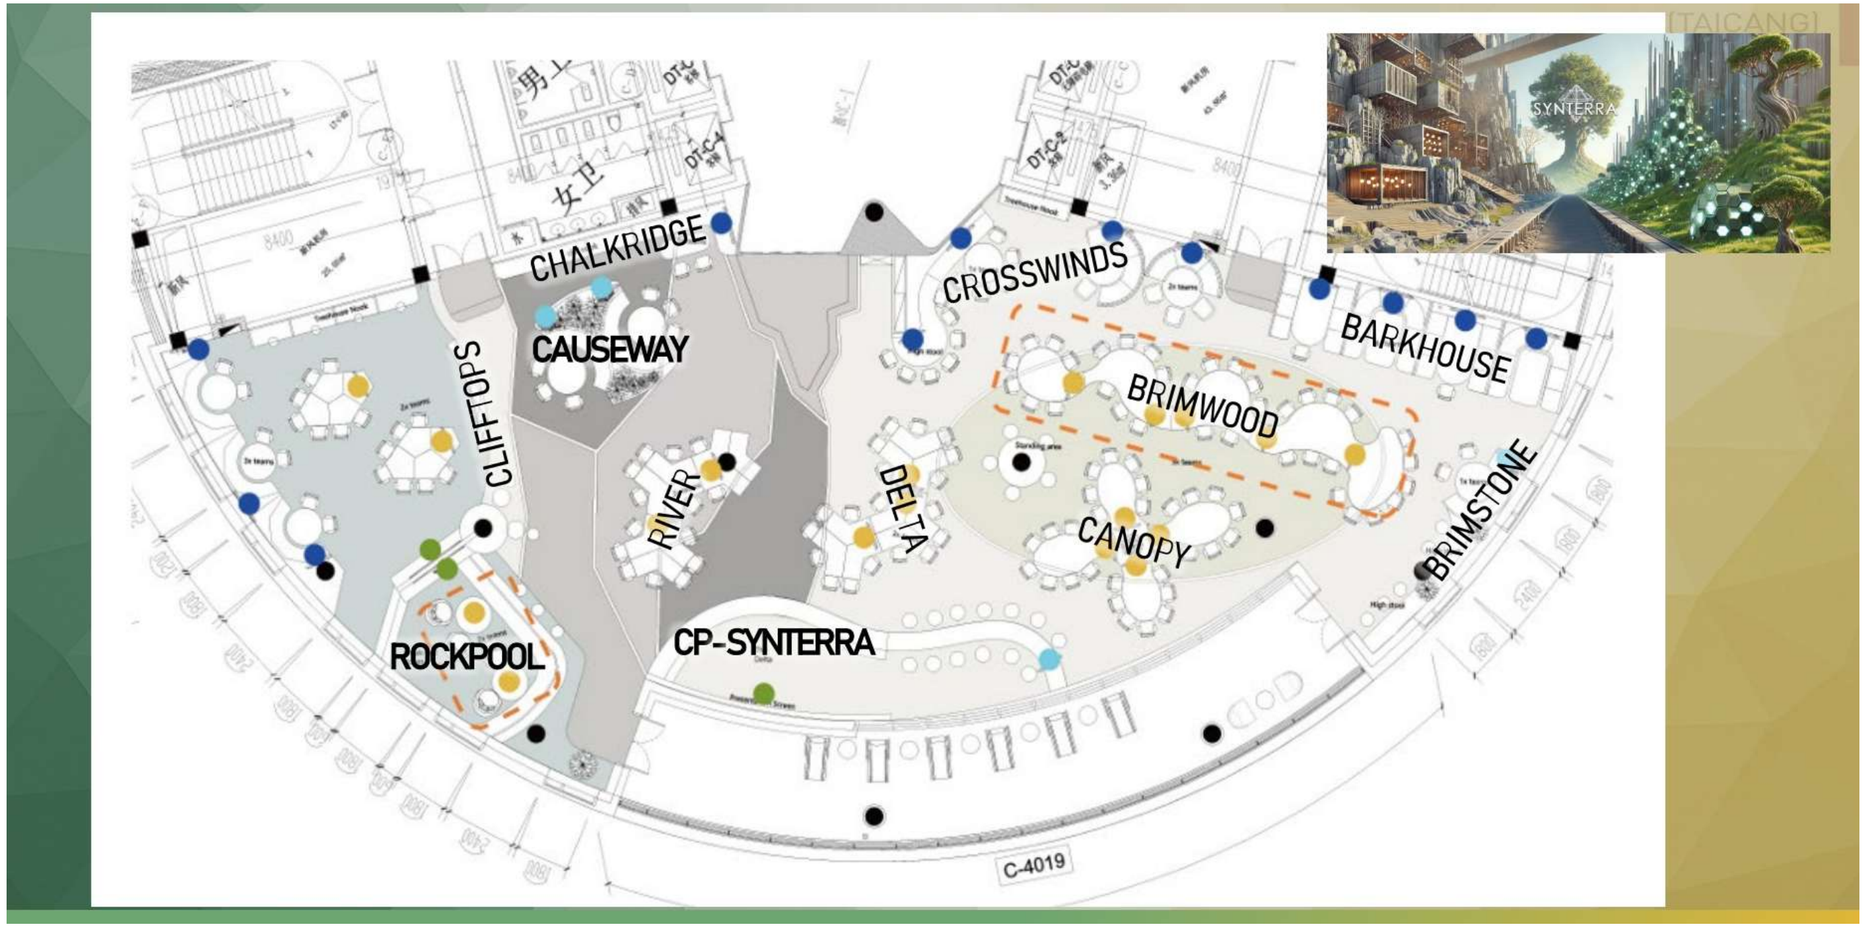

BEFORE WE START

Do You Know ENT and the EEH?

SYNTERRA STUDIO

Find Your Zone

PART 1

Finish Your Problem–Solution Choice

Two or three problems, each with a proposed solution, ready to discuss with your mentor.

20 MINUTES · IN YOUR GROUP

PART 1 · TASK

What Your Group Produces

01

Two to three problems

Written as one sentence each, naming who has the problem and what it costs them.

02

Propose a solution for each

One proposed solution per problem. Keep it to what a digital app could plausibly do.

03

A ranked shortlist

Your own order of preference, with the reason for the top choice.

More than three is better than less. Your mentor will help you choose the best-most appropriate for ENT207TC.

Evaluating the Problems and Their Impact

Ask the same four questions of every problem on your list.

Who has this problem, and how many of them are there? Name a real group, not “people”.

What do they do about it today, and why is that workaround not good enough?

How often does it happen, and what does it cost in time, money or risk each time?

Proof could you show without building anything — an interview, an observation, a number?

Score It Before You Choose It

CRITERION	SCORE 1	SCORE 5
Reach	A handful of people we know	A large, describable group
Severity	Mildly annoying	Costs real time or money
Evidence	We assume it	We know it
Can be built in 4-5 weeks?	Needs hardware or new research	A few screens carry the value
Team interest	One person cares	Everyone wants to work on it

What Fits ENT207TC

Too easy

A single form, a website, a landing page, or a feature that already exists in an app you use. Nothing to design.

The right size

Three to five screens carry the core value, users are reachable, and the whole team can contribute.

Too difficult

Depends on hardware, clinical data, regulatory approval, or a model you would have to train.

Your mentor makes the call with you. Check the module handbook requirements before you commit.
